Darknet Exposure Monitoring

24/7 Search for Leaked Accounts on the Deep and Darknet

Adlumin's Darknet Exposure Monitoring can extend defensive capabilities beyond your firewalls, endpoints, and security devices into Russian ID theft forums and the criminal underground. Adlumin protects all domain accounts with automatic notifications and password resets if a business account is leaked.

Deep & Darknet Leaked Account Scanning

The Adlumin platform and OEM partners work collectively with data to measure risk associated with specified data breaches or credential leaks to help prevent account takeovers and credential stuffing attacks. For critical (privileged accounts) and high (unprivileged accounts) severity breaches. Our platform also determines when a leaked account is potentially usable on the protected network. Adlumin can initiate an automated victim notification (to include the user and security team), and force a password reset of the business domain account that was leaked.

How Adlumin Protects Customers Against Breaches

Adlumin knows the exact date and time that every account on your network last changed its password. Our Security Operations Platform enhances that data with information about if (and when) your account(s) were exposed on the darknet. If an account was exposed and the last password change precedes the exposure date, it is at extreme risk for being used by an intruder to access your network.

Extend Your Defenses
Adlumin's darknet monitoring gives you visibility beyond your boundaries, so you understand your exposures or what threats may be planning before an attack occurs.

Insulated Detection
Protect your security team from their own exposure. Adlumin takes the risk out of darknet monitoring by acting as your proxy. So, your team can operate securely.
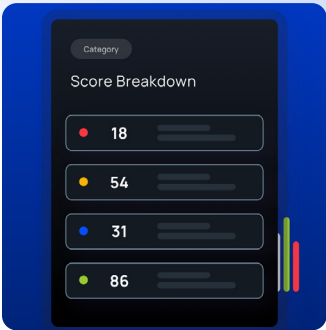

Automatic Alerting
Clean up exposed credentials quickly with automated notifications to affected users or those responsible.

Adlumin Darknet Exposure Monitoring Features

Leaked Account Scanning

Using data collected from both OEM partners and Adlumin, we can make effective quantification of risk associated with a specified data breach or credential leak, which helps prevent account takeovers and credential stuffing attacks.
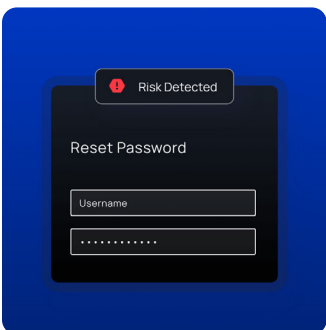

Protects All Domain Accounts

For critical (Privileged Accounts) and high (Unprivileged Accounts) severity breaches, Adlumin determines when a leaked account is potentially on the protected network.

Account Security Insight

Our platform knows the exact date and time that every account was updated and security analytics enhance that data with information about account exposure exposed on the darknet.

Automated Noti ication and Password Reset

Adlumin can initiate an automated victim notification (to include the user and your security team), and force a password reset of the business domain account that was leaked.

What makes Adlumin Different?

**We won't let your organization get caught in the dark.**

Adlumin provides the premier command center for security operations built specifically for the channel. We stop advanced cyber threats, eliminate vulnerabilities, and take command of sprawling IT Operations with Adlumin's Security Operations Platform plus Managed Detection and Response (MDR) Services. You can manage our platform yourself, through a trusted Partner, or engage Adlumin's Security Operations Center to protect your business 24/7.

Our platform features world-class analytics, compliance reporting and automation tools, integrated threat intelligence, 24/7 search for leaked accounts on the deep and darknet, 90-minute deployment, on-demand customer support, and more.

Adlumin is a cost-effective and attainable solution for small, medium, or large organizations. Customers can monitor and defend their networks locally, in the cloud, and across the globe.

Adlumin Security Operations Platform

Adlumin's Platform plus Managed Detection and Response (MDR) Services is your Command Center for Security Operations.
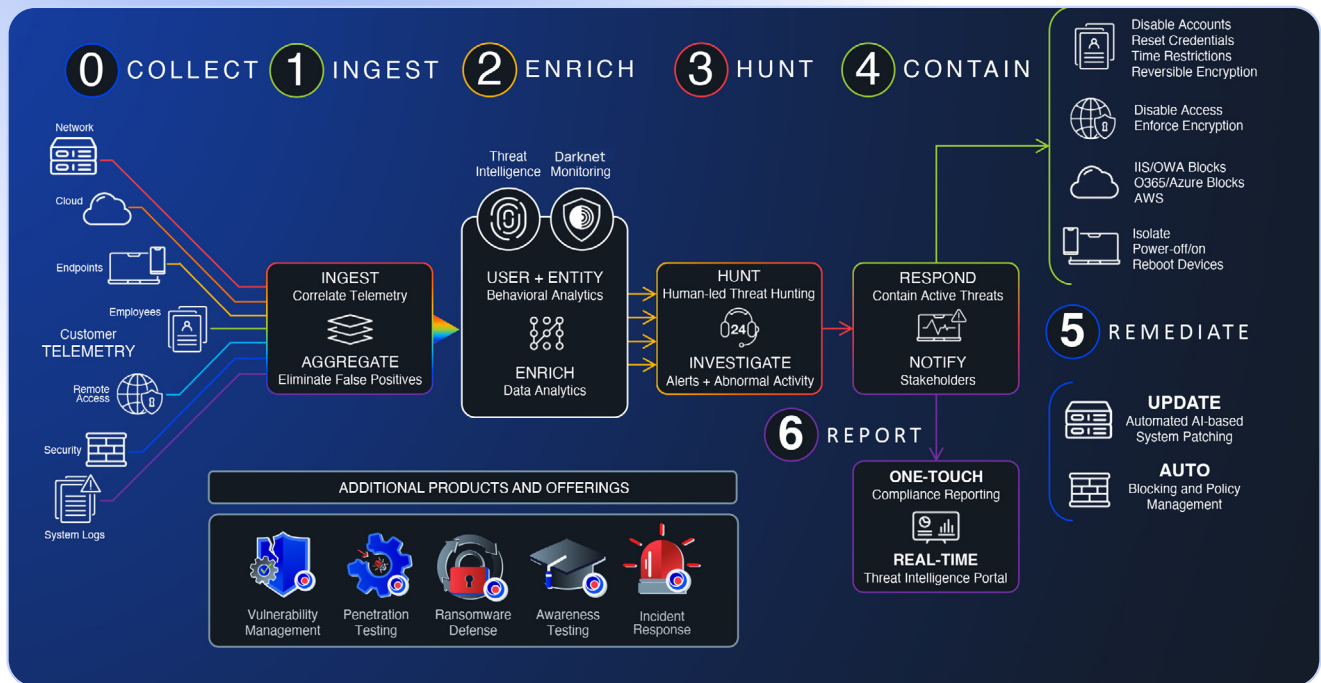

What you can't see poses the greatest risk to your organization. Your exposures lurk in the cloud, hybrid environments, and the darknet. There are countless gaps where threats can hide before they lead to business disrupting events like ransomware shutdowns or massive data breaches.

Adlumin Inc. is a patented, cloud-native Security Operations Platform plus Managed Detection and Response Services. The platform focuses on advanced cyber threats, system vulnerabilities, and sprawling IT operations to command greater visibility, stop threats, reduce business risk, and automate compliance. The command center for security operations, Adlumin leverages powerful machine learning, identifies critical threats, orchestrates auto-remediation system updates, and provides live continuous compliance reporting. Don't let your IT organization be caught in the dark.
